Olin **Zhou**

Computer Science Major · Business Minor · Texas A&M University

(+1) 469-258-4537 | olin.zhou.0@gmail.com | www.olinzhou.com

Education

Texas A&M University   *College Station, TX*

B.S. in Computer Science, Minors in Business   *August 2017 - May 2021*

- GPA: 3.866

Skills

Languages	Java, JavaScript, C++, Python, MATLAB, SQL, Bash Script
Web Development	React, Node.js, Express.js, Bootstrap, HTML, CSS
Tools	MySQL, AWS Lambda/API Gateway, Unix, OpenStack

Experiences

MathWorks   *Natick, MA*

EDG Intern   *May. 2020 - Aug. 2020*

- Automated MathWorks' platform testing process by writing bash scripts that create OpenStack instances to host MATLAB containers
- Created a web UI and Java API to display and filter testing jobs in MathWorks' internal database based on operating systems, clusters, and MATLAB release versions
- Bash Script, OpenStack, Java, GlassFish, SQL, React

Tyson Foods   *Springdale, AR*

Full Stack Intern   *May. 2019 - Aug. 2019*

- Created a responsive and cloud based web intake form to store Tyson Foods' truck incidents for the transportation department and saved Tyson Foods $40,000
- React, NodeJS, AWS Aurora, AWS Lambda, Docker, Kubernetes

Texas A&M University   *College Station, TX*

Undergraduate Teaching Fellow (Newtonian Mechanics)   *Jan. 2019 - May. 2019*

- Led weekly classes that helped underclassmen understand physic concepts related to mechanics by diving deep into physics problems and holding review sessions

Projects

Take a Break, Grab a Cookie   *Jul. 2020*

MathWorks HackDay

- A Windows application that reminds the user to take a break and dims the screen based on a preferred time
- C#, .NET Framework

Stock Alert   *Jan. 2020*

Personal Project

- A web application that alerts users by either text or phone call based on the current and desired stock price of a given ticker
- React, NodeJS, ExpressJS, AWS Lambda, Twilio API

Roat Conditions   *Sep. 2019*

Personal Project

- A web application that maps weather details on a static map image based on the user starting and ending location
- Calculates the weather condition every 30 minutes on the route
- React, NodeJS, Google Maps API, Open Weather API

Discord Voice and Image Bot   *Jan. 2019*

Personal Project

- A bot that searches through Reddit for images and sends relavent content to users with chat commands
- Can also play voice files/reactions based on user input
- Python, Discord.py, PRAW API
